Dear Sir:

Enclosed is my completed questionnaire. As per our phone conversation of 10/21/82, it describes our 1115 East Road facility (MODO 79924825). We currently have an interim permit to treat, store, and dispose under Part A. We have been asked for, but do not plan to prepare a Part B application. Instead, we will reclassify ourselves as a generator and operate under the 90 day rule when our interim status terminates.

The facility on Cassens Drive (MODO 00687483) is a generator whom we plan to declare shortly as a "small quantity generator", and file for such under the laws of the State of Missouri.

If you have any further questions regarding either of these facilities, please feel free to contact me.

Sincerely,

Robert T. Arthur, Manager
Manufacturing Engineering
St. Louis Operation
